

Gender-based research, innovation and development for sustainable economies and societal wellbeing

*"I welcome the Summit's objective to discuss how gender continues to be addressed in Horizon 2020, as well as how to further gender mainstreaming in my 3 priority areas of open innovation, open science and open to the world. The future of Europe's knowledge economy will be entirely dependent on women reaching their full potential in STEM careers. My services have therefore created an Action Plan on Gender Equality in research and innovation, for implementation of the Council Conclusions of 1 December 2015, which addressed gender imbalances in research institutions and decision making."* **Commissioner Moedas, Research, Science and Innovation, European Commission**

## GS9Eu Themes

1. **New research** on when, why and how sex-gender issues impact on quality of research, innovation, and development outputs and outcomes
2. How gender continues to be addressed in **Horizon 2020**
3. How to **mainstream gender** into the EU new vision for ERA of Open Innovation, Open Science, Open to the World
4. How the global policy agendas to make the world a better place for all can benefit from incorporating **scientific understanding of sex-gender issues**
5. New efforts to develop reliable, and region and sector sensitive, **performance metrics and gender equality indicators** and statistics, and to integrate them into research, innovation, and development policy actions
6. The contributions made by the Gender Summit platform, and its global community of experts and practitioners, to **advance gender-sensitive and responsive research, innovation, and development.**

*Prof Marja Makarow, Gender in the Nordic Research and Innovation Areas Programme Committee, NordForsk*

*Dr B. Mario Pinto, President, Natural Sciences and Engineering Research Council (NSERC), Canada*

*Dr Beverly Damonse, Group Executive, National Research Foundations of South Africa*

Join **70 speakers and 350 delegates** from around the world in two days of discussions of the latest evidence showing how sex and gender issues impact on science knowledge and practice, and on quality of innovation outcomes. Contribute your knowledge and experience to promote consensus on where improvements are needed, who should take action, and join the Gender Summit community of experts and practitioners to deliver change. The Gender Summit is the best place to keep up with which gender equality interventions work well, why and when. Learn how the gender dimension can be effectively integrated into research and innovation. You will network with leaders of institutions and representatives of research, innovation, policy and gender communities. By taking part, you will be strengthening the momentum and capacity for achieving **lasting change.**

8 – 9 November 2016, Brussels
