

GenderNETCLIM: strengthening gender in climate change knowledge

Ulrike Röhr, GenderCC / Prof. Ines Weller, artec

Aims and methods

- **Networking and assistance for key actors of climate change policy and women scientists in climate change research**
 - Workshops: mutual learning process gender experts and climate experts
 - national competence and expert network
- **Strengthen the use of existing gender knowledge**
 - Transfer and further develop gender related outcomes from former research projects
 - Disseminating information via a knowledge platform
- **Tools to analyse climate change mitigation and adaptation**
 - Adapt and further develop existing gender analysis instruments

Rationale

- More than increasing the number of women in climate change related research and policy
- Mutual and top down support for integrating gender in climate change research and policy
- More value to the significance of gender as a prerequisite for an efficient, sustainable and successful climate policy
- Sex / gender disaggregated data and best practice are lacking / are very sporadic in the field of climate change

Emissionen im Vergleich
Tonnen CO₂-äquivalente im Jahr

Multi-level benefits

for climate change mitigation and adaptation

- Not only technological solutions
- Multiple benefits: health, decent jobs, gender equality/global justice, poverty reduction....
- Social innovation and structural transformation towards decarbonisation
- Contribute to a shift in androcentric structures

Multi-level benefits

for gender equality

- **STE more holistic - more interesting for women?**
- **Gender balance in teams leads to better results**
- **More women in decision making result in different decisions ?**
- **Impacts on society and economy as a whole**

Prerequisites

- **Mandatory integration of gender into project proposal / design (scored in evaluation)**
- **National nodes (networks) for mutual support, mentoring, discussion**
- **Need for strategies to make researchers and politicians aware of the importance of integrating gender**
