19th Gender Summit - Global for SDGs

In September 2019, the Secretary General of the UN, Antonio Guterres, launched the Decade of Action plan to accelerate delivery of the Sustainable Development Goals. He urged all actors to dramatically increase the pace and scale of SDG implementation efforts. The UN 2020 SDG Progress Report has pointed to a number of problems in achieving all SDGs, referring specifically to SDG 5, the report states that: *"the promise of a world in which every woman and girl enjoys full gender equality and all legal, social and economic barriers to their empowerment have been removed, remains unfulfilled"*. The Gender Summit community's concerns that the implementation of the UN SDG agenda might fail women, society and environment if the role of gender was restricted to the issues of empowerment and human rights, was shaped during the 6th Gender Summit – Asia Pacific in Seoul, in August 2015, and expanded later during the 10th Gender Summit – Asia Pacific in Tokyo. Gender knowledge (standing for both biological and socio-cultural aspects) can greatly help verify claims of equality in SDG policies and interventions, as well as pinpoint the sources and consequences of disparities in outcomes for women and men. The objective of GS19 is to involve expert in gender-SDG areas to identify gender knowledge that can be applied already and the knowledge that is still missing but is necessary to accelerate progress across all SDGs during the Decade of Action, ensuring that the improvement made will benefit women and men equally.

19TH GENDER SUMMIT - GLOBAL FOR SDGS : DAY 1

19TH GENDER SUMMIT - GLOBAL FOR SDGS : DAY 2

- > Plenary Session with Mr BAN Ki-Moon
- > Theme 1: Uniting Funders, Doers, and Custodians of Research to Strategically and Comprehensively Advance Quality Gender Research for SDGs
- > Theme 2: Improving Data Collection, and Reliability of Statistics and Indicators on Gender with Intersectionality Dimensions
- > Theme 3: Strengthening Science and Technology for Better Response to Societal Inequalities, Disruptions, and Emergencies
- > Theme 4: Global Climate Technology Cooperation Projects and Gender-Mainstreaming Efforts
- > Theme 5: Science for Peace and for Safe and Secure Societies
- > Theme 6: Developing and Applying Methods of Sex/Gender Analysis for SDGs
- > Theme 7: Adding Value by Exploiting Cross Cutting and Spill-over Gendered Innovations
- > Theme 8: Advancing Science and Inclusive Career Pathways in Sex-related Emerging Research and Innovation Fields
- > Theme 9: Shaping the Next 10 Years of Research and Intervention

About this video

In this Plenary Session, the subject of improving the implementation of SDGs is addressed by political and science policy leaders in the Republic of Korea and Europe.

Both have taken important driving role to advance gender equality in science and integrating gender dimension into research and innovation, through legislation, funding of studies on gender issues, and mainstreaming gender into science curricula and knowledge communication.

The GS19 Guest of Honour, Mr BAN Ki-Moon, under whose watch the UN 2030 Agenda for SDGs was adopted, will reflect on the progress made so far and how to accelerate actions in the next ten years.

About this video

Prof Kim explains what can be learned from monitoring progress in achieving SDGs at national level. So far, both the interest and the level of achievement have been very disappointing. For instance, of the 33 selected gender equality dimensions, only 4 dimensions are receiving attention from more than 50% of countries. Strategic dimensions, particularly related to political and economic empowerment, are receiving the least attention. Prof Kim explains the reasons behind this shortcomings and make recommendations how national review activities could be improved to make better progress in the future.

About the presenter

Eun Mee Kim, Ph.D.
Professor, Graduate School of International Studies; Director, Ewha Global Health Institute for Girls & Women; Ewha Womans University

Eun Mee Kim (Ph.D.) is Professor in the Graduate School of International Studies and Director of the Ewha Global Health Institute for Girls at Ewha Womans University in Seoul, South Korea. Her research focus has been on economic and social development of developing countries, starting from her own country of South Korea since the 1960s from extreme poverty to now a donor of development cooperation. Her research has shifted to how South Korea as a relatively new donor has responded to developing countries with a unique blend of the ownership needs of the developing countries and South Korea's own experience as a recipient of foreign aid during the post-colonial and post-war periods. Her research has now expanded to global public health with a particular focus on women and children, with girls as the most vulnerable yet with the greatest empowerment potential. This research has been supported by the Bill & Melinda Gates Foundation since 2013. She was appointed by the UN Secretary General as one of 15 scientists in the world to work on the Global Sustainable Development Report 2019, which was presented at the UN General Assembly in September 2019 with the title, *The Future is Now: Science for Achieving Sustainable Development*.
